

ABSEIL ACCESS LTD

Reference Project

Installation of Fall Arrest Systems

Location: Holcim Cement plant, Cape Foulwind.

Date: 2005

Client: Holcim Cement

This 50 year old plant manufactures cement products.

Abseil Access Ltd were contracted to install roof top safety lines and anchor eyes on parts of the plant where access was complicated due to a potential falling hazard.

Over 400m of 10mm cable and numerous anchor eyes protect areas like the top of the 50m chimney stacks, coalshed roof gutters, automated crane shed walkway.

All components are 316 stainless steel and installation is compliant with standards AS/NZS 1891 and 4488. Friction and glue-in anchors are tension tested using an hydraulic tension gauge.

As users of these systems the Abseil Access crew install the most practical and cost effective solution.
