

ABSEIL ACCESS LTD

Reference Project

Suspension Bridge Construction

Location: Private Reserve, Chile

Date: November 2011

Client: NZ Trail Solutions

Abseil Access Ltd NZ were chosen to supply a Design and Build vehicle bridge in the Chilean Andes.

A 30-metre long, 1600mm wide, steel deck suspension bridge was chosen as the most cost-effective solution for getting small vehicles across the picturesque gorge. The cable anchors are RB25 drilled and grouted rock anchors. Access to both sides of the gorge was achieved by installing an aerial ropeway.

All components were manufactured in New Zealand. Nine tonnes of materials and tools was containerised and shipped to the location prior to the work team arriving.

The abseil team was supplemented by local labour and the construction completed within the four-week allocated period.
