

ABSEIL ACCESS LTD

Reference Project

Industrial Coatings

Location: Holcim Cement, Waterfront plant, Westport

Date: 1999

Client: Holcim Cement

Abseil Access Ltd were chosen for the full refurbishment of waterfront plant in Westport.

Substrates included bare concrete, urethane coated steel, corroded steel loading structure and old asbestos 'Super 6' corrugate cladding.

Abseil Access developed a successful method of cleaning and painting the asbestos cladding without agitating the fragile surface.

The whole project was completed without using scaffolding which would have restricted use of the plant. Resene paints supplied the full range of coatings required for all the substrates. Window and cladding repairs were required as well as a new 'Milburn' sign.
