

# ABSEIL ACCESS LTD

## Reference Project

### Inspection and Maintenance

Location: NZMP Hawera and other milk processing plants

Date: ongoing since 1994

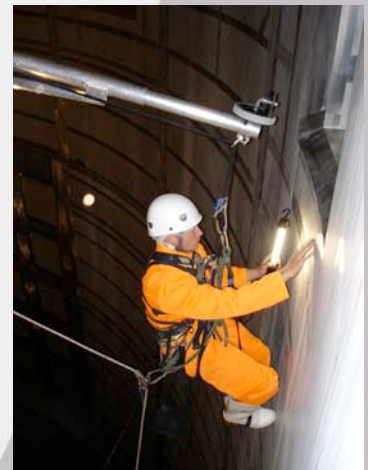

Client: Fonterra

Abseil Access provide rope access services to the milk processing industry.

NZMP in Hawera have 8 stainless steel driers which require full surface crack detection and weld repairs. All this work is complicated by strict hygiene requirements, confined spaces, short shut down periods and minimal rope anchorage points.

Some of the circular drier chambers are 15m in diameter. To achieve full coverage of the internal circumference Abseil Access Ltd have designed and built an aluminium telescopic modular truss boom which is suspended from a single mid point. Inspectors work in pairs and a systematic approach can be easily achieved.

Cyclones, ring driers, ducting and silos are also inspected. Repairs are welded using NZ 4703 certified welders.
