

## Reference Project

## Specialist Cleaning and Maintenance

Radar Domes all over New Zealand require specialist cleaning and repair.

<b>Location</b>	New Zealand-wide
<b>Date</b>	1996 – Present
<b>Client</b>	Airways New Zealand and NZ MetService
<b>Consultant</b>	N/A

Radar domes play a critical part in New Zealand's aviation infrastructure and weather reporting. Abseil Access has been key part in the cleaning and maintenance of these radar domes since 1996 – successfully completing scopes on the following:

- Hawkins Hill
- Balance, Ohaakea
- Mt Robertson
- Cass Peak
- Hokitika rain radar

**The work included:**

- Lightning rod installation and GRP panel replacement
- Bolt Torque checking and replacement
- Inspection and cleaning
- Industrial coatings

Radar dome structures are not designed for ease of access which is why Abseil Access have been consistently summoned to complete these works on an annual basis. Forming strong relationships and building a reputation of reliability, Abseil Access have vast portfolio of project deliverables for Airways New Zealand.
